The Company acquired a Ship Breaking Plot in the year 2007 and to reflect the business of the Company the name was changed to "VMS Industries Pvt. Ltd". The constitution of the Company was changed to Public limited Company with effect from January 29, 2010 and consequently the name was changed to "VMS Industries Limited".

During the year 2004, Gujarat Maritime Board auctioned vacant plots and under open bid we have been allotted vacant Plot No. 160 at Alang-Sosiya Ship Breaking Yard admeasuring 1350 sq. meter on a lease basis. However, our Company could not start ship breaking activities due to change in policy for ship recycling plant, requiring higher size (2700 sq mtrs ) of plot and therefore we could not get permission for utilization of plot from GMB. Meanwhile, in the year 2007, the plot size was enlarged to 2700 sq. meter as per the instructions given by the Inter Ministerial Committee constituted by Hon. Supreme Court, by merging the adjoining Plot No. 159 and our Company was permitted to use the merged Plot No. 160M for a period of 5 years and subject to renewal thereafter.

### INDUSTRY OVERVIEW:

#### SHIP BREAKING INDUSTRY:

##### Overview

Scrap from ship breaking fetches a very good price in the market. If prices express consumer preference, then there is a strong preference for the ship-recycling scrap. This is because of the high quality of steel that comes in the form of re-rollable scrap from ships. Ships are manufactured with acute specifications. The manufacture of ships is done usually in the developed countries and the specifications are monitored closely in order to avoid accidents. The general features of steels that are used to manufacture ships are ability to withstand pressure, high impact and strain on account of severe cold. These features if translated into manufacture of bars and rods may give us similar qualities of steel with equal strength.

The material processed from ship breaking scrap is better in terms of yield strength, notch impact strength and through thickness ductility. In terms of chemical composition it is consistent and has low sulphur and phosphorus content. In terms of metallurgical properties, steel from ships are normalized, fully killed and has finer and more compact grain structure, free from inclusions, pores and cracks and austenitic properties. Hence for all kinds of applications those require impact resistance, corrosion resistance, machinability, bendability, and formability, steel from ship breaking scrap has been found to be more suitable than steel from ingots and billets. Incidentally, everywhere else in the world the scrap from the demolished ships are usually sent into melting furnaces, India is probably only country that has the technique of re-rolling scrap into producing construction steel without having to first cast scrap as billets and ingots.

In order to produce a tonne of steel through the integrated steel plants one tends to consume more power and fuel and non-replenish able resources like coal, iron ore and limestone and other minerals. The sunk costs in terms of capital employed are higher in the integrated steel plants and the integrated plants create far less employment. Indeed, we can obtain our required input material from the ship recycling industry at

##### RISK MANAGEMENT

The Company is exposed to the risk from the market fluctuations of foreign exchange as well as the fluctuation in the price of iron and steel. The Company's raw material is old ship, which is purchased from the international market on credit ranging upto 180 days to 360 days. Though the Company is not hedging or covering the foreign exchange requirement, the Company is regularly monitoring the foreign exchange movement and suitable remedial measures are taken as and when felt necessary. Though the Company is employing such measures, the Company is still exposed to the risk of any foreign exchange fluctuation.

Likewise, the Company's finished products are mainly re-rollable scrap generated from Ship Recycling and the price of the same is linked to the market rate for iron and steel. Any ups and downs in the price of the iron and steel will affect the profitability of the Company. The Company keeps a watch on the movement of scrap prices and accordingly decides its policy regarding purchase of ships and sale of scrap

##### FUTURE PROSPECTUS

The business activity of Ship-Recycling industry at Alang Ship Breaking Yard is likely to increase substantially in view of favorable availability of second hand ships and demand of ship-recycled material. Your Company is also optimistic that with the stabilization in price for the old ship in the international markets and in the sale price of recycled products in the domestic market, the Company will be able to improve the turnover and the profitability ratios in the coming years.

##### CERTIFICATIONS

The Company had received the certification under the ISO 9001:2008, ISO 14001:2004 and OHSAS 18001:2007 for Ship-Recycling activities.

##### HUMAN RESOURCE DEVELOPMENT

The Company recognizes human resources as its biggest strength which has resulted in getting acknowledgement that the Company is the right destination where with the growth of the organization, value addition of individual employees is assured. The total number of employees as on 31<sup>st</sup> March, 2016 is 40.

##### INTERNAL CONTROL

The Company has an adequate internal control system for safeguarding the assets financial transactions of the Company. The strong internal control system has been designed in such a way that, not only it prevents fraud and misuse of the Company's resources but also protect shareholders interest.
